

Inside Authorization Terminal

Streamlined Dispenser Authorization at Your Fingertips

OPW's IAT allows attendants to easily authorize fueling for cash-paying customers or customers who are not included in site's existing payment network.

Inside Authorization Terminal

The Inside Authorization Terminal (IAT) from OPW Fuel Management Systems, when operated with an OPW FSC3000™ Fuel Site Controller, allows fuel site attendants to authorize fueling for customers who pay cash or are not part of the site's payment network. Open or close sales, view dispenser and terminal statuses and more from the indoor console's user-friendly touchscreen interface.

Applications

- Ideal for co-ops or small fuel re-selling operations with attendants on-site
- Configure IAT to authorize transactions for select fueling positions
- Change prices of products that are set up in the FSC3000 right at the IAT console
- View dispenser and terminal statuses from console's touchscreen interface

COST-EFFECTIVE

The IAT provides the streamlined capabilities needed to solve authorization challenges caused by special payment requirements

EASY TO CONFIGURE

All setup takes place in the IAT; no additional configuration in the FSC3000™ Fuel Site Controller is needed

OPERATIONS VISIBILITY

See the status of all dispensers and Fuel Island Terminals for a quick view of fueling operations

EASY TO USE

Simple menus and graphics-focused screens make navigating the touchscreen interface quick and easy

Contact your OPW representative to learn more about the Inside Authorization Terminal today!

Inside Authorization Terminal

Features

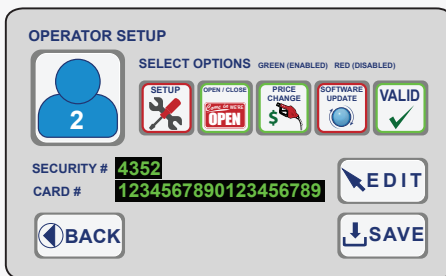

- Authorizes and de-authorizes dispensers from an indoor location
- Supports up to 16 fueling points
- May be configured to authorize transactions for select fueling positions on a fuel site
- Communicates with FSC3000™ Fuel Site Controllers to provide authorization and transaction details
- Up to 9 operator profiles may be configured in the console with different levels of permissions available
- Displays current status of all dispensers and FITS in the system
- Close transactions for IAT-authorized dispensers at the console
- Pump Transaction History displays sales closed through the IAT
- Tracks shift changes for configured operator profiles
- Includes Shift and End-of-Day transaction reports

Benefits

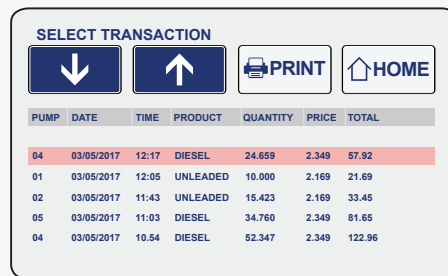

- Intuitive full-color touchscreen interface provides a simple user experience
- Console's streamlined profile limits its footprint, making it ideal for counter-top applications
- Provides seamless, integrated operation for sites that host compatible outdoor Fuel Island Terminals
- Operates independently from a site's Point-of-Sale system, enabling fuel sites to accept cash payments and cards outside of network
- Operator need not be logged into the IAT to view dispenser status
- Console enables operators to change prices for products configured in the FSC3000
- Console alerts attendant when a transaction needs to be authorized
- Plug-and-play solution requires minimal configuration
- Automatically closes last shift of the day at midnight
- Mounting base offers adjustable viewing angles

Specifications

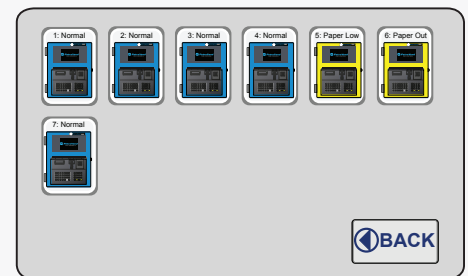

- Dimensions: 8.3 in H x 12.8 in W x 2.4 in D (21 cm H x 32.5 cm W x 6 cm D)
- Power: 120/240 VAC +/- 10%, 50/60 Hz, 30 W
- Operating Temperature Range: 32°F to 122°F (0°C to 50°C)
- Display: 7.1 inches (18 cm) color LCD
- One (1) RS-232 communication port
